Storage

360° full view, further peace of mind.

Control the camera angle in the app, with a rotation angle of 355° horizontally and 90° vertically easily covering a 360° field of view.

**High-gain antenna, stable
transmission.**

Good wall penetration, strong anti-interference.

Long battery life. Always on Guard.

The built-in 9000 mAh super lithium battery far exceeds the standards of similar products. Charge for 15 hours and it works for up to 8 months.

9000 mAh
Super Capacity

USB Charging

Solar powered, uninterrupted security.*

The solar panel works as the power supply,
getting you rid of the trouble of charging.

*External solar panel is optional.

1080P image quality. Restore the scene.

The high-performance 1/2.9" CMOS sensor, resolution of 1080P HD, together with a wide-angle lens, provides fine imaging and captures every detail for you.

Wide-angle Lens

HD Image Quality

Normal Image Quality

1080P Image Quality

Dual Light Source with Color Night Vision.

Full Color Mode

Upgraded high power white-light source. It's able to take color pictures at night.

Normal Mode

Built in with IR LED array. Night vision range is up to 7-10 m.

Switch night vision mode in the app.

IP65 Waterproof and Dustproof

No stress for outdoor guards.

IP65 Waterproof and Dustproof

Strict waterproof test in compliance with the international standard Seiko Manufacturing.
Regardless of weather conditions, keep you safe 24/7.

App Control

View what's happening around your house through the app.
Easy live stream and video playback.

Two-way Audio

Video Playback

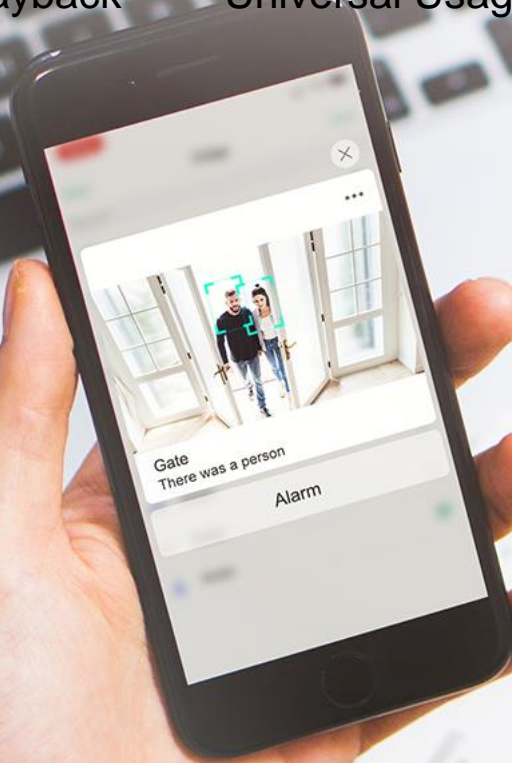

Universal Usage

Remote Control

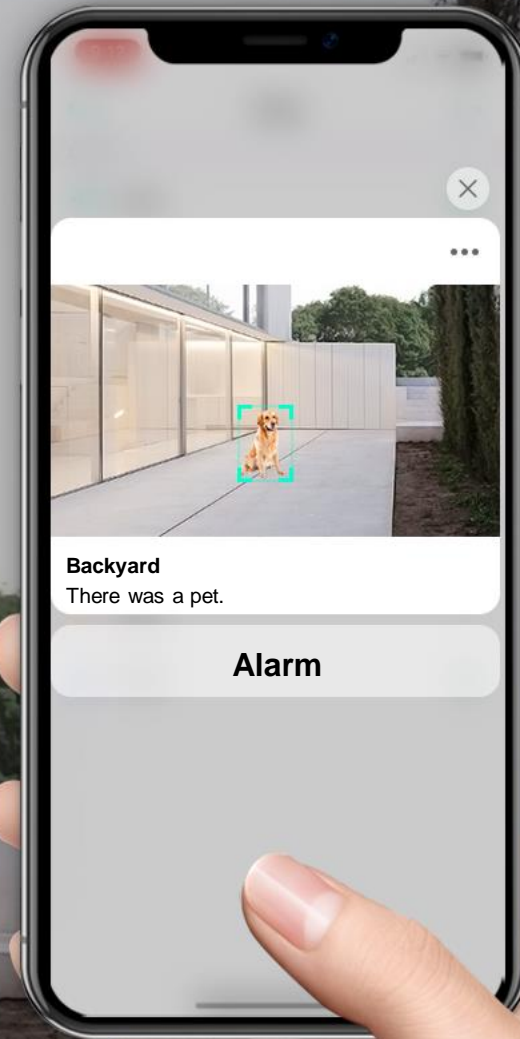

Multi-user Sharing

PIR sensing and triggering, with the help of cloud-based intelligence, are more than just a little bit smarter.

PIR sensing technology + cloud image analysis

PIR triggers the camera, and real-time analysis is done in the cloud and notifications are pushed to the app instantly.

Advanced AI technology. The ability to think makes it different.

Object recognition and behavior analysis.

AI recognition and analysis algorithms intelligently distinguish humans, vehicles, pets with detailed analysis results of passing, staying or leaving, etc.

Notifications are pushed to the app instantly, keeping you informed of what's happening wherever you are.

Human Recognition

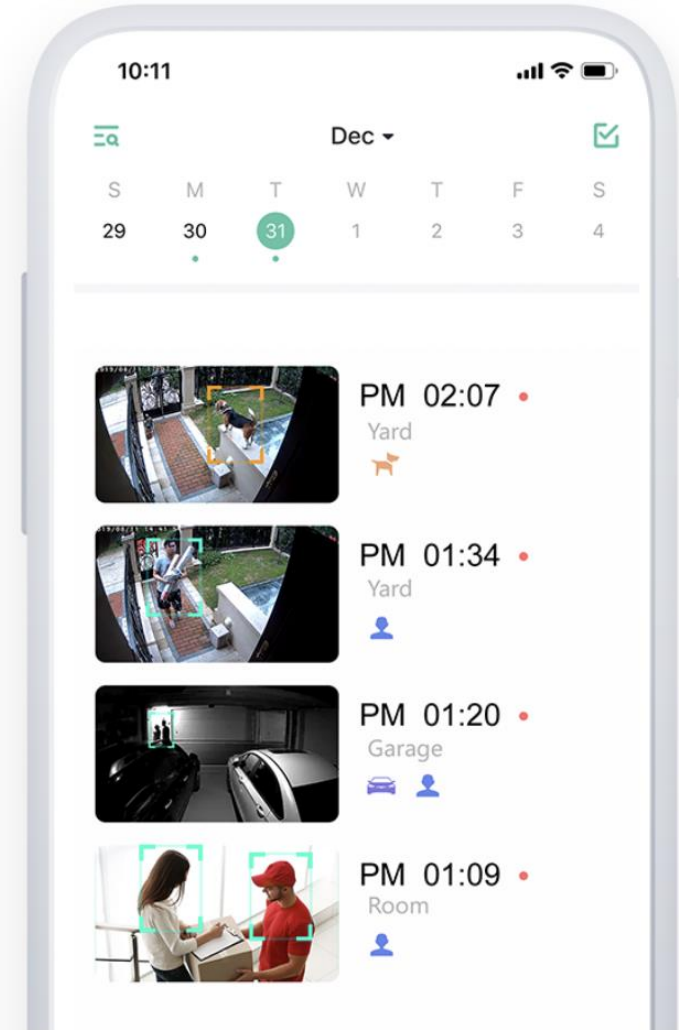

Pet Identification

Vehicle Identification

Package Inspection

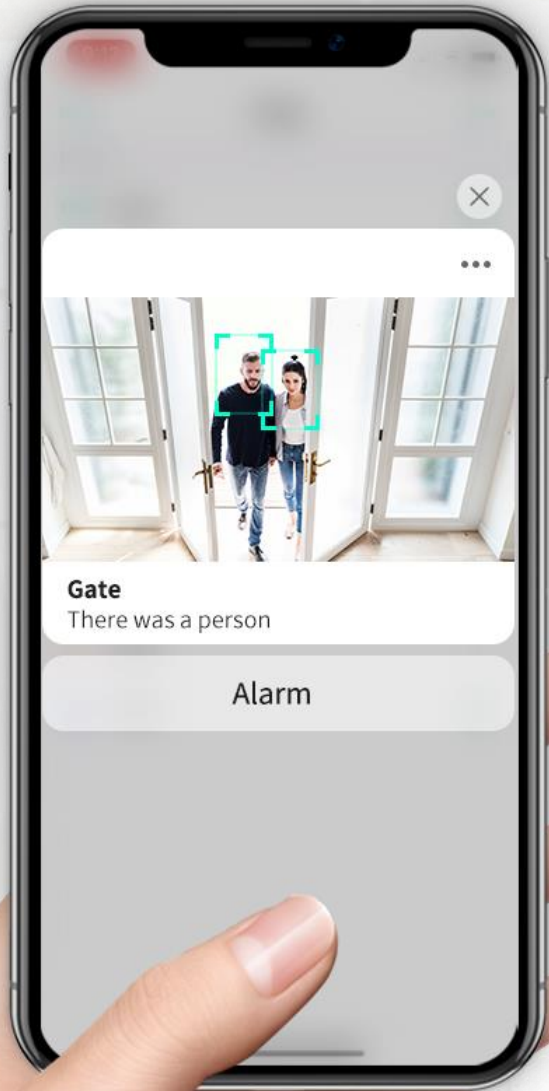

Activity Zone

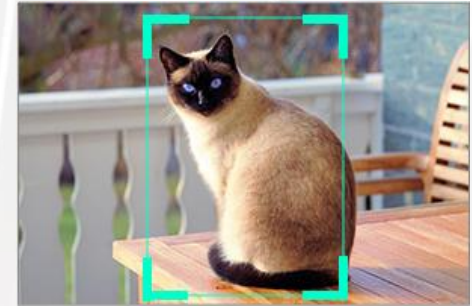

Accurately draw customized activity zones in the mobile app.
Irrelevant information outside the area would be filtered.
The key area, the key focus.

Smart Notification

Set targeted category in the app, and the cloud AI system will only push notifications when the targets are detected. No more redundant pushes.

Push activities of humans

Push activities of pets

Package deliver notification

Vehicle parking alert

Two-way audio for live communication.

With the built-in waterproof and dustproof microphone and Hi-Fi speaker, you can warn remotely to stop the loss in case of an emergency. For family and friends, live chat to experience intimate interactions, regardless of time and location.

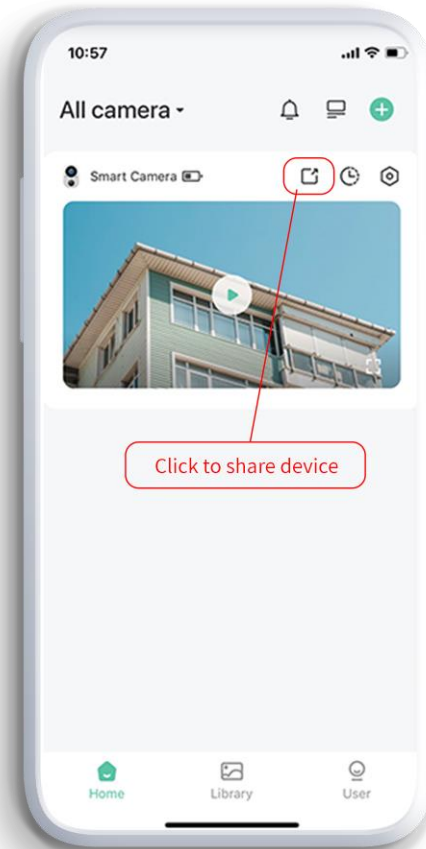

Easy to share access with family and friends.

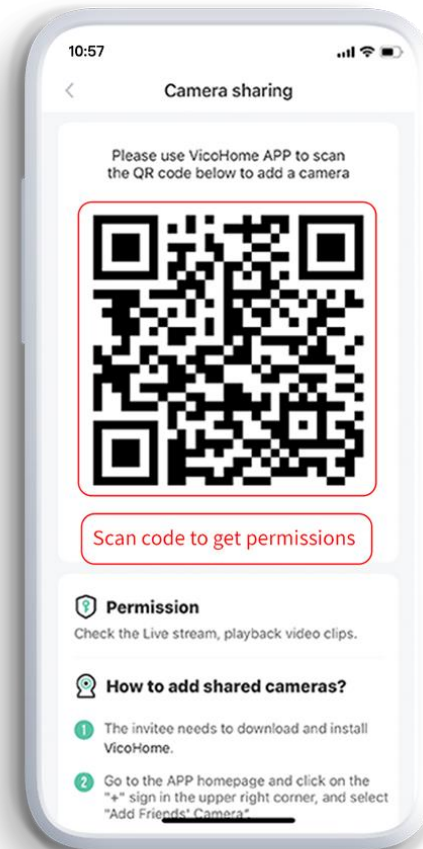

Access can be shared through the mobile app.
Family and friends can scan the code to get camera access fast and easily.

Camera Sharing

Scan Code for Access

Alternative Methods of Storage

Cloud Storage

Up to 60 days of cloud storage*. Intelligent backup to prevent lost.

Local Storage

Micro-SD card storage up to 128 GB, recording without network.

*Some cloud storage and AI services require additional fees. To find out more information about this, please refer to the app.
